avatarin demonstrates robotics applications at NVIDIA AI Summit Japan

avatarin Inc. ("avatarin"), a Tokyo-based AI and robotics spin-out of ANA Holdings Inc., showcased its AI capabilities at the NVIDIA AI Summit Japan¹ in Tokyo held November 12-13, 2024. avatarin participated in this event as a member of the NVIDIA Inception² program for cutting-edge startups.

avatarin uses the NVIDIA Jetson platform for edge AI robotics to enable AI capabilities on its communication AI robot, *newme*[®]. At the NVIDIA AI Summit, avatarin demonstrated automatic speech recognition (ASR³) and attribute analysis using *newme*[®], which will help it to analyze and optimize real-world processes.

avatarin will continue its mission to build a global human support network through continued AI and robotics development.
